

Fighting the flu face-to-face

WHAT THEY DID

This facilitywide UBT in Orange County encouraged employees to get vaccinated by:

- » distributing fliers and emails to tell employees about the vaccines and where to get them
- » conducting face-to-face discussions with co-workers and physicians about the safety of the vaccine
- » providing free and easy access to vaccinations via a mobile flu cart with an assigned LVN during all shifts
- » offering the FluMist® alternative for employees who don't like needles

Increase in employee flu vaccinations
